

A black and white photograph of a Midwest Camera Car Kit Car. The vehicle is a four-wheeled, open-frame utility vehicle with a perforated metal body. It features four seats, a steering wheel, and a dashboard. The vehicle is parked on a paved surface in front of a large metal trailer. The text "MIDWEST CAMERA CAR" is overlaid in the top left corner of the image.

# Kit Car EV camera Vehicle

The "Kit Car" is our EV mobile camera vehicle. We've spent years refining and re-designing this platform in order to offer a mobile camera platform that offers infinite rigging points as well as versatility that can offer a variety of camera setups. Ideal for steady cam, stabilized heads, jib arms and midsize telescopic cranes, such as our Telescopic F27. The air bag suspension allows the operator to balance the load and maintain a level surface. The four passenger seats have rotating ability for quick adjustments. This unit has 4 wheel drive option, which works well for off road use. Accessory cart includes speed rail and fittings, various Mitchell mounts, nuts/bolts and safety accessories.

## Kit Car Specs

- 1200 lb. capacity
- 35 mph max speed
- Length 117 inch
- Width 56 inch
- Airbags Suspension
- AWD/2WD/VersaTrac Turf Mode
- 4 Rotating seats
